# RISK MANAGEMENT SERVICES

PT Rismanindo Kreasi Lestari or Risk Management Indonesia (RMI) is a wholly-owned subsidiary of IBS Group providing a wide range of risk management services. Established in 1985, RMI has a broad range of experience in helping costumers in managing their risks with positive results.

Risk Management, as a discipline, is concerned with the application of multi-faced techniques for the identification, assessment, control and finance of risk associated with a company's operations. A company's risk profile will normally include physical, financial, legal and operational risks, which may or may not be fully transferable, and the Risk Management program must be practically tailored to work efficiently within the company's commercial realities.

RMI team consists of highly experienced engineers who have very good reputation and track records in the Indonesian risk management sector. Their loss control and underwriting survey reports are very well-regarded and well-accepted by the various clients and local / international insurers and reinsurers that their reports serve.

Working closely with IBS Risk Service and IBS Reinsurance Service teams, RMI professional risk services interface with comprehensive insurance program to provide a complete risk solution for our costumers. These professional risk services include risk consultancy in property, energy, and engineering, for underwriting and/ or loss control purposes of safety auditing.
