

REINSURANCE SERVICES

REINSURANCE SERVICES

Access to secure domestic and international reinsurance capacity has never been more important to the Indonesian Insurance market than it is today.

IBS Reinsurance Services (Indonesia) was formed in 1992 as a value-added and high quality reinsurance services resource to the Indonesian domestic and joint-venture insurers.

IBS Reinsurance Services has since then established an outstanding reputation based on high quality risk knowledge, presentation and program structure. We can assist in either facultative or treaty placements in proportional, non-proportional and excess of loss structures, and cover is available across all fields of reinsurance.

We are able to directly access and control reinsurance placements and negotiate directly with the underwriters and retrocessionaires who will develop the pricing requirements for insurance programs and most importantly, make decisions on the admissibility and quantum of insurance claims submitted.

Over the past 15 years, international reinsurance underwriting for Asian risks have evolved from the traditional hubs of London, Europe and North America to Asia's leading regional center in Singapore. In response to this change, we established IBS Reinsurance Brokers Singapore Pte. Ltd. in 2004, to capture the capacity switch to the region. The Singapore office allows even closer links with regional and global reinsurers and greater exposure to market developments that can be used to the eventual benefit of our clients.

IBS Reinsurance Services will also continuously work closely with selected ceding companies to develop new and innovative program structures for our corporate and insurance clients, and to access new and changing reinsurance market as they evolve, again to the eventual benefits of our clients and the overall Indonesian insurance Industry.
